

## The Issue Based Coalition on Social Protection in Europe and Central Asia: Menu of Services

The IBC-SP-ECA aims to (1) support coordinated country work (e.g., through the development of a results-oriented joint vision at the regional level, technical support, and knowledge sharing); (2) contribute to UN reform.

The main areas of work for the IBC-SP-ECA are:

- **Support for in-country activities** - The IBC will provide integrated technical support through the development of practical tools and direct assistance, including through technical missions, to results groups and UNCTs in country in their efforts to support social protection reforms while focusing on collaborative approaches. Specific support activities include:
  - Provision of expertise to guide diagnostics and dialogues as a basis for consensus (among UN agencies, and with government partners) on priority policy areas and actions. This may include support to MAPS missions, UNDAF preparations, development of COVID-19 Socio-economic impact assessments and response plans, joint SDG programmes, systems assessments (e.g. ISPA diagnostic tools), national SDG dialogues.
  - Fostering south-south exchange, sharing of experience, etc.
  - Guiding positions on big emerging issues with potential impact on social protection systems (e.g. migration, demographics and aging).
- **Knowledge development and sharing** - The IBC will document ongoing UN collaboration efforts and good practices to expand and improve social protection in the region. These knowledge products will be disseminated via a variety of channels (websites, social networks and blogs) also including seminars and trainings organized by the UN system.
- **Common regional positions and advocacy** - The IBC develops regional definitions and common positions on social protection, relevant to the context and needs of the ECA region.
